Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant is requested to draw a clear line of demarcation between the present application and applicant's related application 10/768,500 which also claims a similar quick connect type connector and clip for verifying complete connection wherein the connection clip includes opposite clip portions verifying portion of specified length corresponding to the distances of an annular engagement projection and an annular verification projection on the tube and including reinforcement ribs.

Drawings

The drawings are objected to because figs. 24 and 25 should be labeled as prior art.

Claim Rejections –35 USC § 112

Claims 1-9 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, lines 16-17, and claim 5, lines 17-18 it is unclear what is meant by "receiving a held portion from a large

diameter portion". In claim 1, line 27, it appears that "a" should be changed to "said" before "pair of restraining portions" since the "restraining portions" have already been recited in line 22 and from the specification there does not appear to be two sets of "restraining portions".

Claim Rejections – 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. § 102(b) as being anticipated by Japanese patent 11-6591. The Japanese patent illustrates the present invention with tube 1 having an annular engagement projection 22 and an annular verification projection 23. The tube fits into the female connector 10 and is sealed therewith via seals 15,16 and retained therein via retaining means 32. Further a clip body 40 is presented having opposite U-shaped clip portions 42 and 43 for verifying correct connection of the tube within the female coupling. As shown in
